Summary

Frontend developer & graphic engineer who turns design systems into fast, accessible, production-ready code. Skilled in **React, Next.js,** and **Sanity CMS**, experienced in building SEO-friendly platforms and helping non-technical teams manage content easily with headless CMS workflows. Brings a graphic engineering foundation and modern **AI-assisted** practices to deliver polished, modern interfaces.

Education

Novi Sad School of Applied Technical Studies Bachelor of Applied Engineering in Graphic Engineering and Design
Graphic Engineering and Design Novi Sad, Serbia • 2002 - 2009
https://vtsns.edu.rs/

Career Summary

Matica Srpska (BMS) Novi Sad, Serbia
Presentation & Visual Design Contributor 2023 - 2026

- Provided design and technical assistance preparing and formatting visual presentations for major cultural and academic exhibitions across four consecutive years
- Handled typographical alignment, image preparation, and layout structuring to meet institutional technical file standards
- Collaborated directly with curators and academic staff, ensuring accurate, deadline-driven delivery of publication-ready materials
- Contributed to notable exhibitions including Srbski narodni kalendar (1851 - 1853), the Bedriž Smetana-200 Years and Sreten Stojanović-125 Years

Freelancer October 2018 - April 2024
Freelance Frontend Developer & Personal Assistant

- Mastered the modern frontend ecosystem **React**, **Next.js** and **TypeScript** through self-directed study and hands-on freelance client work
- Managed concurrent freelance web projects alongside high-responsibility caregiving duties, demonstrating strong self-motivation and time management under competing priorities
- Transitioned from traditional graphic design to component-driven **UI/UX** engineering, applying a graphic engineering foundation to modern, code-based interfaces

High Tech Engineering Center September 2016 - June 2017
Front-end developer

- Converted PSD designs into pixel-perfect, responsive interfaces using **HTML5**, **CSS3**, and JavaScript/jQuery
- Diagnosed and resolved cross-browser bugs across **HTML5**, **CSS3**, and **JavaScript** codebases, improving site stability
- Built reusable Angular Material 2 components, standardizing UI patterns and accelerating feature delivery
- Developed new product features using Angular 2, extending core application functionality

OMA Adriatic Part of the OMA Emirates Group October 2015 - March 2016

Frontend Developer & Graphic Engineer

- Redesigned and rebuilt web portals with **HTML5**, **CSS3**, **JavaScript**, and **Responsive Web Design** (RWD), improving usability across devices
- Designed visual assets and **UI layouts** that balanced performance optimization with brand consistency across web properties

Vega IT Sourcing February 2015 - March 2015

Front-end developer

- Completed an intensive one-month front-end development practicum, building responsive web pages from scratch under senior developer mentorship
- Applied **HTML5**, **CSS3**, **JavaScript** (jQuery), and **Responsive Web Design** (RWD) to deliver practicum project work

Foto oko August 2011 - February 2012

CTP Operator

- Managed end-to-end Computer-to-Plate (CTP) prepress workflows, ensuring high-quality plate production for offset printing
- Performed quality control reviews of digital files, catching technical errors before imaging to prevent costly reprints
- Coordinated closely with prepress and editorial staff to convert manuscripts and layouts into print-ready files, consistently meeting tight production deadlines
- Maintained and calibrated CTP imaging equipment, minimizing downtime and ensuring consistent output quality

Projects

Kulturni Heroj

A dedicated web blog portal exploring and documenting cultural topics and figures from Serbia. Built with a structured, user-friendly interface featuring secure authentication and an admin dashboard that lets invited administrators independently add, edit, and delete blog content.

Balans Sibira

A wellness-focused platform built with a headless architecture: **Next.js** (App Router) for a fast, SEO-friendly frontend, **Sanity CMS** for flexible content management, and **Resend** for reliable email delivery. Used **GitHub Copilot** throughout development to accelerate coding, refactor logic, and optimize performance, with a minimalist design inspired by Siberian wellness traditions.
